

POSTDOCTORAL POSITION  
CENTER FOR LANGUAGE SCIENCE  
The Pennsylvania State University

For fullest consideration, all materials should be received by **June 10, 2012**.

The Center for Language Science (CLS) at The Pennsylvania State University (<http://cls.psu.edu/>) invites applications for an anticipated postdoctoral position. The CLS is home to a cross-disciplinary research program that includes a new NSF training program, Partnerships for International Research and Education (PIRE): Bilingualism, mind, and brain: An interdisciplinary program in cognitive psychology, linguistics, and cognitive neuroscience. The program provides training in research on bilingualism that includes an international perspective and that exploits opportunities for collaborative research conducted with one of our international partner sites in the UK (Bangor, Wales), Germany (Leipzig), Spain (Granada and Tarragona), The Netherlands (Nijmegen), Sweden (Lund) and China (Hong Kong and Beijing) and in conjunction with our two domestic partner sites at Haskins Labs and the VL2 Science of Learning Center at Gallaudet University. The successful postdoctoral candidate will have an opportunity to engage in collaborative research within the Center's international network.

We welcome applications from candidates with preparation in any of the disciplines that contribute to our program. The successful candidate will benefit from a highly interactive group of faculty whose interests include bilingual language processing, language acquisition in children and adults, and language contact, among other topics. Applicants with interests in these topics and with an interest in extending their expertise within experimental psycholinguistics and cognitive neuroscience are particularly welcome to apply. There is no expectation that applicants will have had prior experience in research on bilingualism but we expect candidates to make a commitment to gain expertise in research on bilingualism and also in using neuroscience methods, including both fMRI and ERPs. There is also a possibility of teaching one course during the academic year in the Program in Linguistics.

Questions about faculty research interests may be directed to relevant core training faculty: **Psychology**: Judith Kroll, Ping Li, Janet van Hell, and Dan Weiss; **Spanish**: Rena Torres Cacoullos, Giuli Dussias, John Lipski, and Karen Miller; **Communication Sciences and Disorders**: Carol Miller; **German**: Carrie Jackson, Mike Putnam, and Richard Page. Administrative questions can be directed to the Director of the Center for Language Science, Judith Kroll: [jfk7@psu.edu](mailto:jfk7@psu.edu). More information about the Center for Language Science (CLS), about the PIRE program, and faculty research programs can be found at <http://cls.psu.edu> or <http://cls.psu.edu/PIRE>.

The initial appointment will be for one year, with a strong possibility of renewal for the next year. Salary and benefits follow NSF/NIH guidelines. The search is open to all eligible candidates regardless of citizenship. Applicants should send a CV, several reprints or preprints, and a statement of research interests. This statement should indicate two or more core faculty members as likely primary and secondary mentors and should describe the candidate's goals for research and training during a postdoctoral position, including previous experience and directions in which the candidate would like to develop his/her expertise in the language science of bilingualism. Candidates interested in gaining teaching experience should include information on teaching experience and preparation. Applicants should arrange for three letters of recommendation to be sent separately.

Application materials and letters of recommendation should be sent electronically to [pirepostdoc@gmail.com](mailto:pirepostdoc@gmail.com). We will begin to review applications by June 10, 2012. We will consider applications until the position is filled. The appointment can begin as soon as August 1, 2012. We encourage applications from individuals of diverse backgrounds. Penn State is committed to affirmative action, equal opportunity and the diversity of its workforce.
